

SIMULATION / TRAINING

HOLOKIT

SITUATION SIMULATIONS
WITH MIXED REALITY TECHNOLOGY

BENEFITS

- Full-metal replica handgun with custom sensors - Implemented for XR solutions
- Instant switching between Mixed Reality and Virtual Reality
- Cordless, using high-end PC performance, photorealistic rendering, comfortable usage

The essence of the application is that during usage the user is able to see the real environment, which is further augmented and overlaid with virtual content.

To enhance the realism of the experience, we integrated the closest possible copy of a firearm into the system.

The physical firearm can reproduce the feeling of a real firearm by giving recoil and a firing sound when the trigger is pulled.

The advantage of the application is that it is portable, it may be used anytime and anywhere. Possibilities are endless, any tool or weapon can be integrated later on.
